VOLANTEUS

Flying Redefined

Private Charter

We offer comprehensive luxury charter solutions across a fleet of thousands of aircraft worldwide supported by a passionate and experienced team that thrives on delivering. Partnering with our trusted suppliers, we deliver unmatched air charter solutions.

First-time charter

Private jet charters can be complex and confusing. It's essential to work with a people-first company who offer the human element — rather than an online portal — and can help you navigate this expansive industry.

Government & royalty

We work with royal families and governments across the USA, Europe and the Middle East and are familiar with the specific requirements and procedures that these passengers and their close-protection officers require.

Technology sector

Many of our clients fly to/from the tech hubs of the Bay Area and those in Europe and we maintain a variety of trusted partners that service this popular route with high-speed Wi-Fi onboard (KA/KU band).

Flight departments

Our aircraft are sourced through our extensive local knowledge and relationships across the globe and our approach to partnership extends into all aspects of the aviation experience, including handling agents, caterers and chauffeur services.

Consultancy

We offer consultancy services to organisations who are looking for advice on both chartering services and their own private jet fleet. We're also happy to discuss and advise on fractional and part-share jet ownership.

Music industry

We understand that no two music events are ever the same; what worked last time might not this time. From festivals to tours, and providing transport for equipment and instruments, we offer perfectly tailored solutions.

Film industry

We arrange flights for location shooting to press junkets, and fly talent, productions teams and studio executives. Our understanding of this industry makes Volanteus first choice for many of the world's largest studios and streaming services.

Sports industry

Sports travel comes with significant time, media and performance pressures. As such, teams, athletes and supporters need a trusted partner that has the experience, contacts, discretion and eye for detail to secure the right aircraft.

Helicopters

Helicopter charters are ideal for those looking to travel directly to their destination quickly and efficiently. We can organise interlining helicopters with your flight, fly into events or even organise crew transportation to off-shore oil rigs.

Group Charter

From event travel and team transport to emergency repatriation and humanitarian aid, Volanteus has all-encompassing expertise in aircraft charters. We understand the importance of meticulous attention to detail in delivering a successful travel experience.

Cruise

We have a strong history of partnerships with some of the world's largest cruise companies. Our teams work side by side with cruise and travel operators to ensure their customer's experience is seamless and memorable. We also organise essential movements such as crew rotations, repatriation and emergency response.

Sports teams

Volanteus is a trusted name within the world of elite sporting teams and events. We work closely with national teams and global organisations to arrange VIP flights, team travel and fan experiences. We are well versed in the nuances of event logistics and personally depart every charter flight we organise.

Orchestra

The global touring demands and scale of orchestral groups presents a unique set of challenges. We understand that tight timelines and secure instrument transport are a necessity to keep ensembles on track. Given the high value and intensely personal nature of orchestral instruments, it's essential that you can trust your travel partner.

Emergency response

Our expert team and 24/7 Operations department offers global coverage to react to fast-moving situations and support those who need assistance. These types of short-notice flights need to be arranged by a team with unrivalled experience and connections who can deftly navigate rapidly-changing situations and deliver results when they're needed.

Humanitarian relief

We're proud to support a number of humanitarian organisations and NGOs with charter flights that transport healthcare professionals, aid and military personnel to the most crisis-affected regions of the world. Successfully operating flights in challenging, unstable and hostile environments requires the highest levels of professionalism, experience and situational awareness.

Repatriation

At Volanteus, we have built a vast network of connections and knowledge from extensive charter experience. We offer repatriation enabling people to return to their home country. When unfortunate circumstances strike, we're here to help businesses, governments and non-governmental organisations and everyone in between get home swiftly.

Energy industry

Specialising in supporting oil, gas and renewable energy companies, our operator due-diligence, safety assurance protocol and strong partnerships with aviation safety auditing companies makes us first choice. We organise Fixed Wing and Rotary aircraft for crew changes, and flights to remote frontier areas only using operators experienced in geographically challenging locations.

Sustainability

At Volanteus we take real steps to ensure the planet we leave behind is better than how we found it! We're participating in carbon and emission offsetting schemes and investing in the Aviation Climate Fund.

What is SAF?

SAF is produced mainly from different biological resources: waste lipids, sugars that have converted to hydrocarbon, other differently processed biomass, agricultural waste, plant and animal fats such as oil, as well as bio-derived hydrocarbons and fatty acid esters. One of the greatest benefits of SAF is that it works perfectly well with existing aircraft. Currently, traditional aviation fuel can be blended up to 50% with SAF – delivering a huge decrease in emissions long-term.

Book & Claim

Sustainable Aviation Fuel is jet fuel that's produced from renewable sources. We've initiated one of the first 'Book and Claim' programmes that sells SAF credits allowing clients to buy SAF for aircraft without uplifting it themselves. The credit bought will be used in another aircraft flying out of an airport that provides SAF. Most airports blend SAF into their existing fuel supply, so there's a chance you've already flown using sustainable fuel without even knowing it.

Special Passengers

Travelling with children or animals can be both rewarding and challenging, often at the same time! That's why we work with our clients to create unique flying experiences that are sure to calm, surprise and delight.

Very Important Pets (VIPs)

As pet-lovers, we understand that when it comes to looking after our four-legged companions, only the best will do! We'll oversee the legal requirements and can furnish the cabin with toys.

Little companions

In-flight entertainment is vital in keeping children happy and we're able to provide a variety of services. If desired, we'll theme decorate the aircraft and offer a variety of in-flight refreshments.

About us

Our extensive knowledge of luxury business aviation, passion for service excellence, and our partnerships with specialist businesses allows us to meet any requirement. Our Values are fundamental to all we do here at Volanteus; we're a dedicated, expert team who make aircraft charter truly personal, offering bespoke charter flights whenever required, to destinations worldwide. Our skilled team are on hand to advise on Quality Assurance, Desktop Audits and Compliance.

Flight Care

We firmly believe that finding the perfect aircraft is only step one in delivering an exceptional charter experience. The multitude of logistics that go into executing a seamless flight require meticulous planning and attention to detail.

Flying redefined – our team excel in a wide range of intricate and meticulous logistics that come with aircraft chartering. As a result of their extensive knowledge of the aviation sector, our business is always one step ahead, anticipating and reducing risks before they materialise into problems. This profound understanding serves as the foundation for our "Flightcare" philosophy and guarantees our clients a safe, comfortable trip each and every time.
